

Your support is urgently needed in the counties of Ulang/Nasir

2/5/2007

Duany Union has learned from one of our commissioners that one of the most urgent problems facing residents of the counties of Ulang & Nasir is the inability to connect Payam administrations with county commissions. Lack of medicine, clean water, foodstuffs, education supplies and many more obviously top the list of the most urgent basic needs with acute shortage in our counties, but the ability to share information about life threatening emergencies, infighting among locals and other problems of similar nature is one thing we can afford them in the shortest time possible.

Duany Union believes it is our obligation to positively respond to the needs of the people for whom the organization was founded to serve. Thanks goodness, it is tax time and several among us may get financial leverage from IRS refunds. Please do your part; contact your appointed representative with your gift of \$75 or more to help buy equipments that would make it easier for county commissions and Payam administrations to share information about life threatening emergencies.
